

# Release Package 24.2

## Phoniro Release Information

When we update our IT system Phoniro Care and our apps, you can find what we have done in the Release Information. We continuously develop our applications to give you better functions and higher stability. By keeping up-to-date, you will get the most from your investment.

When we launch a new version of Phoniro Care, any of our apps, and/or software for our alarm servers, it is called a release. These new versions we collect into a release package. Sometimes there are several new versions (releases) in one release package but other times there is only one new version included.

## Versions included in this release package

### Phoniro Care version

Phoniro Care
3.59 (new release)

### Alarm server versions

Phoniro Local Alarm Server (PLAS)	Phoniro Alarm Server Cloud
1.15.2 (new release)	1.15.2 (new release)

### Apps versions

Phoniro Home Care (Android & iOS)	Phoniro PI (Android)	Senior Living (Android)
2.3 (new release)	2.3 (new release)	1.21 (new release)

### What features are included in a release?

Some of the features will be automatically shown to you after an upgrade.

However, other features need to be activated and configured for them to take effect. Such features are marked with this symbol: ⚙️. These features might involve configuration costs as well as a monthly cost.

Contact our Service Center for more information on how the features can be used in your organization.

## General News

### Phoniro Care User Administration Changes

#### *Simplified Navigation*

To make it easier to find a staff member's access role and login information locally, these settings are now divided under different icons. This is the same division that already exists under central administration.

#### *Greater flexibility*

The organization role for a staff member can now have **different start and end times** for different permissions. These are handled in a flexible way under the staff members's access role.

**Organisationsroll**

## General News (cont.)

### Minor changes

- Improvements of the report "Overview Client" in Excel format
- All log books in Phoniro Care can now be exported to Excel
- Staff members with ended organization role will not appear locally
- When a staff member is ended, their connections no longer appear in the local organization
- When a care recipient is ended, their connections no longer appear in the local organization
- The care recipient's personal data is no longer displayed for local connections when the order is ended
- The staff member's personal data is no longer displayed for local connections when the order is ended
- ⚙️ Current staff member presence is now also shown locally. This function needs to be activated by Phoniro.
- Updated help texts on the page "Mobile phones"
- ⚙️ Possible to adjust the distribution of organization roles. This is made in the central administration is this function needs to be activated by Phoniro.

**Tilldela organisationsroller**

Administratörens rolltyp med högsta säkerhetsnivå styr vilken nivå hen kan delegera.

Administratörer med organisationsroll kan delegera:

Rolltyper med samma eller lägre säkerhetsnivå.

Enbart rolltyper med lägre säkerhetsnivå.

- ⚙️ It is now possible to set limited permissions for care recipients. This is made in the central administration is this function needs to be activated by Phoniro.
- We have added a button in numerous places in Phoniro Care, that will make it easier to clear all text fields in a form. This is used in both local and central administration.

## Digital Key Management

### New setting for Deadbolt lock type

Now it is possible to set if a lock is of the deadbolt type in Phoniro Care. This setting will hide the lock button for this lock type in the Home Care app. In Phoniro Care this is clarified with **a help text**. We are doing this to prevent a scenario where the deadbolt lock could be unlocked, even though it seems to have been locked in the app.

### Functionality for new medicine cabinets

We have added functionality for our new medicine cabinets, which will replace our existing model, MC03. To be able to use our new medicine cabinets, you need to upgrade Phoniro Care and the Home Care app to the versions that are included in this release package.

### Minor changes

- An **explanatory text** (good/low/critical) is completing the icons in battery reports to add even clearer battery statuses

- The possibility to set a time per organization for how long a user can remain logged in to the Home Care app. The default value is 16 hours, but it can be adjusted to a range between 1 and 48 hours.

## Digital Monitoring

### ⚙️ Anonymization (blurred image) in the e-visit web user interface

It is now possible to use a blurred image from cameras in order to prevent identification of the care recipient during a digital visit.

Please contact Phoniros Service Center to activate the function.

### Minor changes

- The map function in the e-visit web user interface is removed
- Clarification for the function “Copy Supervision Times for Supervision Schedule”. It now also displays information when a user attempts to create a schedule that conflicts with an ongoing one.
- We have added **a reminder** on how to handle e-visit schedules during transition to daylight saving time.

Schemat ska gälla för alla dagar  
 Rullande schema

Start och sluttid  
Om Slut lämnas tom gäller schemat tillsvidare.

Start  Välj Tid  :00

Slut  Välj Tid  :00 [Rensa](#)

Vid övergång till sommartid (sista söndagen i mars) behöver du tänka på att tillsyner som läggs mellan 02:00-03:00 inte kommer visas. Se hjälptexten högst upp på sidan för mer information.

## Alarm System

### Minor changes

- Care recipient information is no longer visible under “Local Administration Room” if the care recipient’s order has been ended.
- Care recipient information no longer appears on alarms in the Senior Living app if the user’s order has been ended.
- Possibility to control the monitoring of the radio base, i.e., whether it is available or not.
- We are now launching the Senior Living app for iOS for those who want to use Apple iPhone. Contact us to plan implementation in your operation.
- It is now possible to **add a department** directly when new staff member is created. It is also now possible to add a department under **Central Staff Administration**.

The image shows two screenshots from the Phoniro system. The left screenshot is the 'Ny personal' (New staff) form. It has several sections: 'Personuppgifter' (Personal information), 'Adresser' (Addresses), 'Inloggning och behörighet' (Login and permissions), and 'Avdelningar' (Departments). A red box highlights the 'Avdelningar' section, which shows a list of departments (Avdelning #1 to #5) with checkboxes. The right screenshot is the 'Redigera avdelningar för personal' (Edit departments for staff) form. It shows a dropdown menu for 'Organisation' set to 'Kommunen SÄBO'. Below it, there is a list of departments (Avdelning K1 to K5) with checkboxes. At the bottom, there are 'Spara' (Save) and 'Avbryt' (Cancel) buttons.

- It is easier to **search for users with apartment devices** in local administration

The image shows a screenshot of the 'Administration av brukare' (Administration of users) form. It has a search bar at the top and a 'Ny brukare' (New user) button. Below the search bar, there are input fields for 'Förnamn' (First name), 'Efternamn' (Last name), 'Personnr' (ID number), and 'Brukarnr' (User number). A red box highlights the 'Telefonnummer lägenhetsapparat' (Apartment device phone number) field, which is linked to a search function. At the bottom, there are 'Rensa fält' (Clear field) and 'Sök' (Search) buttons.

## Alarm System (cont.)

- Possibility to **filter by camera** in the Event Log for Phoniro 6000.

Startsida > Administration > Loggböcker > Phoniro 6000

### Händelselogg för Phoniro 6000

- **Reminder** to add where messages should be sent if the contact with the Alarm Gateway is lost

### Koppling till Alarm Gateway

Hämta larm från Alarm Gateway

Du behöver fylla i vart meddelande ska skickas om kontakten till Alarm Gateway tappas. Det gör du under Meddelanden i Phoniro 6000-profilen.

- There is the possibility for each organization to set a time for **how long a user can be logged into the Senior Living** app. The default value is set to 0 hours, which means that the staff is never logged out. An administrator can adjust the value between 0-48 hours. If the value is greater than 0 hours, the function is activated and the administrator needs to choose how the app should behave if the staff has an ongoing presence. By default, the user remains logged in after the set time has passed if they have a presence. They are later logged out as soon as the presence is finished. Alternatively, the system can be configured so that the user is logged out even if they have a presence. The presence will then be automatically terminated.

### App - Automatisk utloggning

Tid till användaren loggas ut automatiskt  
 Anges i timmar. 0 = funktionen avstängd 16

Användare med pågående närvaro  
 Både närvaro på larm och planerad närvaro avses.

Användaren förblir inloggad och närvaron är kvar

Användaren loggas ut och närvaron avslutas

## How do I get access to new releases?

---

### Phoniro Care

#### *For customers with Phoniro Care in their own operation*

- You can download the files you need, together with technical information, from the storage space you have gained access to from us. Then you upgrade on your own.

#### *For customers who buy Phoniro Care as a service*

- Before an upgrade, you will be contacted by us to ensure that you have the latest software. Then we upgrade for you. Easy!

You do know that we offer fast and free upgrades when you let us take care of the operation of Phoniro Care? Contact us for more information.

### The apps Home Care, Phoniro PI and Senior Living

- Our apps are usually continuously updated via Google Play/AppStore.

### Would you like to learn more?

More detailed information about the features is provided in our user manuals. All Phoniro Care's solutions are described on our website <https://www.phoniro.com/>
