

Phoniro Release Information

When we update our IT system Phoniro Care and our apps, you can find what we have done in the Release Information. We continuously develop our applications to give you better functions and higher stability. By keeping up-to-date, you will get the most from your investment.

When we launch a new version of Phoniro Care, any of our apps, and/or software for our alarm servers, it is called a release. These new versions we collect into a release package. Sometimes there are several new versions (releases) in one release package but other times there is only one new version included.

Versions included in this release package

Phoniro Care version

Phoniro Care
3.64 (NEW RELEASE)

Alarm server versions

Phoniro Local Alarm Server (PLAS)	Phoniro Alarm Server Cloud
1.15.7.0 (existing)	1.15.7.0 (existing)

App versions

Phoniro Home Care (Android & iOS)	Phoniro PI (Android)	Senior Living (Android)
3.1.1 (existing)	3.1.3 (existing)	2.1.4 (existing)

What features are included in a release?

Some of the features will be automatically shown to you after an upgrade.

However, other features need to be activated and configured for them to take effect. These features might involve configuration costs as well as a monthly cost.

Contact our Service Center for more information on how the features can be used in your organization.

Generell information

App Versions

To ensure that the locks have the necessary and latest software, we recommend verifying that both the Home Care app and the PI app are updated to the following versions:

- Home Care app: version 3.1.1
- PI app: version 3.1.3

These updates are essential for the system to function correctly and deliver optimal performance.

Client Administration

This release includes an improved search function for client administration. Clients can now be searched by entering full or partial names. A new field has also been added to enable location-based search, making it easier to find clients linked to the same location.

The screenshot shows the 'Administration av brukare' (Client Administration) page in the phoni CARE system. The page has a blue header with the 'phoni CARE' logo. Below the header is a navigation bar with icons and labels for 'Startsida', 'Administration', and 'Brukare'. The main content area is titled 'Administration av brukare' and contains a paragraph explaining that users can edit existing client information or add new ones, with a link to '(Mer hjälp)'. A green button with a plus icon and the text 'Ny brukare' is located on the right. Below this is a form with five input fields: 'Förnamn', 'Efternamn', 'Personnr', 'Brukarnr', and 'Plats'. The 'Plats' field is a dropdown menu currently showing 'Abborrevägen 146, Till vänster'. At the bottom right of the form are two buttons: 'Rensa fält' (Reset field) and 'Sök' (Search).

Logging

This release includes a new feature for monitoring logging in Phoniro 6000. The logging has been extended and now shows when the heartbeat is lost and when it resumes. The information is presented in the logbooks in Phoniro Care.

The screenshot shows the 'Händelselogg för Phoniro 6000' interface. It includes a breadcrumb trail: Startside > Administration > Loggböcker > Phoniro 6000. Below the title, it states 'Här visas en händelselogg för Phoniro 6000. (Mer hjälp)'. The interface has several filter fields on the left: 'Från' (2025-10-21), 'Till' (2025-10-22), 'Brukare', 'Personal', 'Kamera', 'Larmkategori' (Alla), 'Avdelning' (Alla), 'Rum' (Alla), and 'Visningstäge' (Grupperade händelser). On the right, there is a list of events with checkboxes, titled 'Alla | Ingen'. The list includes: 'Phoniro 6000 startad', 'Dörr upplåst', 'Medicinskäp upplåst', 'Ringt lägenhetsapparat', 'Brandlarmsöppning startad', 'Brandlarmsöppning avslutad', 'Ny position', 'Övertämning extern larmcentral lyckad', 'Övertämning extern larmcentral misslyckad', 'Ändrade från anonymiserad till klar bild', 'Kommunikation med Phoniro 6000 tappad', and 'Kommunikation med Phoniro 6000 återupptagen'. The last two items are highlighted with a red box. At the bottom right, there are icons for 'Visa' and 'Excel'.

How do I get access to new releases?

Phoniro Care

For customers with Phoniro Care in their own operation

- You can download the files you need, together with technical information, from the storage space you have gained access to from us. Then you upgrade on your own.

For customers who buy Phoniro Care as a service

- We upgrade Phoniro Care for you and make sure you have the latest software. Easy!

Do you know that we offer fast and free upgrades when you let us take care of the operation of Phoniro Care? Contact us for more information.

Home Care, Phoniro PI and Senior Living apps

Our apps are usually continuously updated via Google Play/AppStore.

PLAS

If you want to upgrade your PLAS, please contact our Service Center and book an upgrade.

Would you like to learn more?

More detailed information about the features is provided in our user manuals. All Phoniro Care's solutions are described on our website <https://www.phoniro.com/>
